

1. Title of the Best Practice:

In Search of Knowledge - Weekly Staff Seminar

2. Objectives of the Practice:

- Staff Seminar is a concept of research paper presentation by the faculties of the PG Centre.
- In this, Faculties present their research work in their areas of Specilization.
- As an outcome of the presentations, new frontiers are identified and the research is focussed on these by the respective faculty.
- Since the presentation by the faculty is made to all the streams of PG, interdisciplinary approach automatically gets focussed.

3. The Context:

- Faculty of various specializations get exposure by attending the staff seminar.
- Further, research ideas can be initiated among multidisciplinary audiences.

4. The Practice:

- Staff Seminar is a unique concept at our PG centre. It provides the platform for the faculty members to present their research work on a weekly basis.
- Staff seminar opens up different research avenues for the faculty members.

5. Evidence of Success:

- Staff seminar is a platform for faculty members to bring out their new ideas and innovation in the field of research.
- Further, Faculty members publish papers in reputed journals.
- As a result of presentations, multidisciplinary approaches of research are being developed in the PG Centre.
- For example, the faculty of management stream has been able to spread its wings to the areas of Life Sciences and contribute innovative ideas as to how management principles can be applied to Life Sciences research.
- Likewise, General Statistical tools which can be developed for interdisciplinary research have come to the fore as a consequence of the Staff seminar.

6. Problems Encountered and Resources Required: Not Applicable.
