Title of the Event and name of the venue:

Title: Alumni Interaction Series on **Embracing Change: How to Stay Ahead in the Ever-Evolving Tech Landscape** for the I year MCA students.

Venue: MCA Classroom-06.

Details of the department organizing the event in collaboration with institution.

Organized by the Department of Studies in Computer Science

Purpose and scope of the event

The purpose of this alumni interaction series aims to equip students and young professionals with insights from successful alumni on adapting to the ever-evolving tech industry. The series will focus on continuous learning, staying current with emerging technologies, developing a growth mindset, and career resilience. It seeks to provide practical advice, personal experiences, and networking opportunities to help participants stay ahead in their careers.

Details of the talk/event/activity:

The event began with the introduction about the resource person Mrs. Nrudhya Murugesh by Mrs. Rachana C R, Associate Professor and Head. Mrs. Nruthya is an alumnus of 2014 batch MCA and now working as a UI flutter. First she gave tips to students about how to study and how to work smart rather than hard. She gave the difference between a programmer and developer and gave more details about UI flutter. Then she spoke about the evolution of Tech Landscape and covered the importance of awareness, key emerging technologies like AI, cloud computing, block chain, IoT and impacts on industries.

Embracing a continuous learning mindset is crucial for staying relevant and adapting to changes. Key strategies include taking online courses, reading and researching industry trends, earning certifications to validate skills, and attending workshops and webinars for hands-on learning and networking opportunities.

She emphasized to the students that "Mastering problem-solving and critical thinking is essential in today's tech-driven world due to increasing complexity, unpredictable challenges, and the need to future-proof your skills. These abilities will enable you to navigate complex technological landscapes, address unexpected issues effectively, and remain adaptable in a rapidly changing environment. Exploring intersections in technology broadens your horizons by exposing you to diverse fields and innovative solutions. Networking and collaboration are vital for expanding your professional connections and fostering new opportunities. Building your network involves engaging with industry peers, attending events, and participating in online communities". She also told that developing soft skills such as communication and teamwork is crucial in the tech sector, as they complement technical expertise and enhance overall effectiveness.

In the fast-paced tech world, hands-on experience is essential for applying skills and staying adaptable. Embrace continuous learning to thrive in a dynamic environment and use technology tools to boost productivity. Establish a strong personal brand to showcase your expertise and differentiate yourself in the industry. Mastering interview techniques, from preparation to confident presentation, is crucial for career success. These strategies together will help you excel and stand out in tech. These points were well received by the students and the session ended with a vote of thanks by Ms. Geetha, student of II sem MCA.

Resource person:

Nruthya Murugesh, UI Flutter Developer, Aurinopro Solutions Ltd.

Target audience and No. of Participants/beneficiaries

In Total 40 Students of II Semester MCA.
