K R S Road, Metagalli, Mysuru – 570 016

Date: 29.01.2026

**Title of the Event and name of the venue:**

Skill Assessment Program conducted by Secuzity, Mysuru.

Venue: MCA Lab 04 & 05.

**Details of the department organizing the event in collaboration with institution :**

Department of MCA in association with Secuzity, Mysuru.

**Purpose and scope of the event:**

The Skill Assessment was conducted with the primary objective of comprehensively assessing students' technical knowledge and practical understanding in key areas such as Cyber Security and Web Development, ensuring they possess the foundational competencies required for real-world applications. It also aimed to evaluate students' problem-solving ability, analytical thinking, and capacity to apply concepts to practical scenarios, thereby identifying learners who demonstrate readiness to contribute effectively to live industry projects. Additionally, the assessment served as a platform to recognize talented and motivated students, facilitate their engagement with industry expectations, and create meaningful internship and project opportunities for eligible candidates, ultimately enhancing their professional skills and career readiness.

**Details of the event:**

The Department of MCA in association with Secuzity, Mysuru successfully conducted a Skill Assessment for final year MCA students on 29<sup>th</sup> January 2026 on campus at 10.30 am.

The assessment focused on two high-demand technical domains Cyber Security and Web Development.

This event was designed to bridge the gap between academic learning and real-world industry expectations. The evaluation process was conducted in two major phases Technical Skill Evaluation Test and Technical Interview. In the Technical Skill Evaluation Test students were assessed through objective and descriptive technical questions and practical knowledge in relevant domains. The test focused on core concepts such as Basics of cyber security, network security, vulnerabilities, ethical hacking fundamentals, risk assessment, web development fundamentals such as HTML, CSS, JavaScript, backend basics, database concepts Logical reasoning and analytical skills . In the second round a structured technical interview was conducted for shortlisted candidates in the Cyber Security and Web Development domain. The interview panel evaluated on concept clarity, practical exposure, project experience(if any), understanding of real-world application, communication and confidence level. This phase helped in identifying students who are technically sound and industry-ready.

The programme was initiated by Smt Rachana C.R, Associate Professor & HoD, successfully coordinated by Dr. Anisha Kumar, Assistant Professor and TPO and Ms. Lakshmitha H.Y, Assistant Professor, Department of MCA.
